Dashboard Tracking

Key Features

- Online leave request submission
- Automated approval process
- Automatic leave duration calculation
- Client-side validation
- Dashboard and reporting

Functional Requirements

Functional requirements describe what the system must do.

Employee Leave Request Submission

The system shall allow employees to submit leave requests.

Inputs

- Employee Name
- Leave Type
- Start Date

- End Date
- Reason for Leave

Request Storage

The system shall store all leave requests in the Leave Request table.

Approval Workflow

The system shall automatically route leave requests to the reporting manager for approval.

Approval Decision

The manager shall be able to:

- Approve request
- Reject request

Leave Duration Calculation

The system shall automatically calculate the total number of leave days based on the selected start date and end date.

Client Validation

The system shall validate leave dates and prevent invalid submissions.

Validation Rule:

- End Date cannot be earlier than Start Date

Notification Generation

The system shall update request status after approval or rejection.

Dashboard Reporting

The system shall display:

- Total Requests
- Approved Requests
- Rejected Requests
- Pending Requests
